## Description

As a mobile monitor stand, the MonLines MBS013S is ideal for professional video conferences or presentations. The robust TV trolley in silver and black can be flexibly positioned and supports screens weighing up to 70 kg and 37 to 70 inch diagonal. Thanks to the 45° tilt function, the viewing angle of the display can be adjusted individually.

The four lockable casters allow the monitor floor stand to be moved from room to room without much time or effort. At the same time, the integrated cable guide ensures that no cable tangle can occur. For use in public areas, the video conference holder can also be locked with the help of a separately available padlock.
